

367 Tent

North

The floor plan shows a large rectangular tent structure with a central area labeled "Roof Hatchpactor". To the left of this central area are two smaller rectangular sections, each labeled "Table". A "Man Door" is located on the right side of the tent. Air flow is indicated by purple arrows: one arrow points left from a box labeled "HEPA" on the left wall, and another arrow points right from the "Man Door" area. Retrospective air sampler locations are marked with red circles containing the letter "R": one is located near the top right corner, another is near the top left corner, and a third is near the bottom center. Dashed red lines indicate the path of air flow from the "Man Door" area, curving around the bottom of the tent structure.
